In an average classroom

ABOUT CO-PRODUCTION

Everything we do at the college is fully co-produced by experts by profession (people who have professional knowledge in a particular subject area) and experts by experience (people who have personal experience of a particular health challenge). This approach empowers people to use their experiences to help others on their recovery journey. We have found that this way of working really brings a different dynamic to the college. Co-production ensures that our services are tailor made to support those that engage with them.
